SUMMARY

- Cross-disciplinary designer with development background
- Analytical mindset that excels at holistic problem-solving
- 2+ years of experience designing and developing web apps

Experience

Web Designer/Developer – Simon Fraser University

Nov 2019 – Apr 2020

Built a CMS website for the ixLab research group to promote their research achievements. Involved with every aspect of building the site including researching, wireframing, programming, and server deployment. Migrated legacy websites across domains and platforms.

UX Visual Designer Co-op – OpenText

Jan 2018 – Apr 2018

Created high-fidelity mockups for UI components while ensuring visual consistency across products. Redesigned legacy icons to meet the updated brand specifications. Organized templates that streamlined the mobile asset generation process for the entire design system.

Data Visualization Designer – University of Calgary

Apr 2017 – Dec 2017

Collaborated with the Canada Energy Regulator to design interactive data visualizations that help the public learn about the energy sector. Analyzed complex datasets with a team of domain experts. Prototyped novel interaction flows that highlighted energy stories and promoted community engagement.
